**** TBD Topic Course Description:** TBD

**** Youth Culture in South Korea Course Description:** How do we reconcile youth penchant for luxury goods and cosmetic procedures with their participation in nation-wide political protests? How are they affected by increased youth unemployment? In what ways do they consume and produce pop culture particularly in relation to idol groups and Hallyu? This course examines the dynamic, vibrant, and politicized youth culture in contemporary South Korea. With a focus on the economy, education, consumption, gender/sexuality, popular culture, and digital media, we will examine Korean youth as new cultural subjects in relation to the challenges posed by recent transformations in Korean society.
